MAHENDRAVARMAA ANBARASAN

Chicago, Illinois | amahe@iu.edu | varmaa.mahi@gmail.com | +1 (331)298-1193 | Github

SUMMARY

Experienced in leveraging Python, SQL, and Power BI to build dashboards, automate workflows, and deliver AI-driven insights for data-informed business decisions.

ACADEMIC QUALIFICATION

Indiana University Bloomington **Aug 2025-Present**
MS in Data Science *Bloomington, Indiana*

- Spring 2026 Courses – Social Media Mining, Information Visualization, Usable Artificial Intelligence

CGPA: 3.76/4

SRM Institute of Science and Technology **2021-2025**
B.Tech in Computer Science and Engineering with Specialization in Big Data Analytics
CGPA: 8.58/10 *Chennai, India*

City University of London **October 2024 - December 2024**
Semester Abroad Program in Data Science *London, United Kingdom*

PROFESSIONAL AFFILIATIONS

MIT Square, London. **October 2024 - December 2024**
Python Developer Intern *London, United Kingdom*

- Designed and implemented **machine learning algorithms** for real-time detection of maternal and fetal health risks.
- Evaluated **model performance** with accuracy, precision, and related metrics to optimize reliability.
- Supported **system architecture design** and integrated **IoT sensor data** into the backend.
- Contributed to result **visualization** and **decision support features**

The Data Science Club, SRMIST **January 2022 - May 2025**
Head of Content Creation

- Directed the end-to-end **content creation strategy** for the club, ensuring high-quality material across platforms.
- Spearheaded the **selection and planning of projects** to be undertaken by the club, aligning with learning goals.
- Designed detailed **event flows and content outlines** for workshops, seminars, ensuring smooth execution.
- Collaborated with faculty mentors to enhance the club's visibility and impact within the student community.

ACADEMIC PROJECT & Internship

E-Volt **Sept 2022- Dec 2024**
Developed an Arduino-based smart energy management system using RFID, sensors, and Bluetooth to automate appliance usage based on room occupancy. Secured £20,000 funding from City University. Implemented at SRM Institute of Science and Technology, achieving ~$500/month energy savings per 75-capacity classroom by dynamically activating electrical appliance sets based on real-time user count.

As part of the **MaterniTrack project on fetal health monitoring**, **Jan 2025 - May 2025**
Helped design a non-invasive, real-time solution using IoT sensors and machine learning to detect fetal and maternal risks early. Contributed to system architecture, developed a user-friendly interface for result visualization, and supported the creation of a decision support system. The project spanned research, prototyping, and testing within a 24-week timeline and received £20000 in funding from City, University of London.

CERTIFICATIONS

- Google Data Analytics by Coursera View Certification **May 2024**
- AWS Machine Learning Foundation View Certification **May 2023**
- Cisco Networking Basics View Certification **May 2023**

TECHNICAL SKILLS

Languages: Python, SQL, C,C++,
Environments: Databricks, JupyterLab, GitHub, Oracle SQL, MySQL
Analysis and Viz Tools: Power BI, Tableau, Adobe Analytics, MS Excel., Snowflake
Knowledge: ML, PySpark, Spark SQL, Apache Spark, Data Pipelines, ETL, Arduino, IoT
